

ONE HAND GUI

The wheel-type dial interface is designed to deliver an exceptional one-handed user experience. By utilizing a rotating wheel mechanism, users no longer need to stretch to reach icons or tiles, as all options are conveniently accessible within the thumb's natural range. The interface offers a customizable wheel size to adapt to various user preferences and needs, ensuring flexibility and comfort for different scenarios.

dial UI

11:47^{pm}

The inner section of the wheel is dedicated to widget operations. Rotating this inner wheel allows users to seamlessly switch between widgets and screens, providing an intuitive and efficient navigation experience.
