WHAT IS ADHD?

ADHD is a neurodevelopmental disorder affecting focus, planning, and impulse control.

ADHD BY NUMBERS

- 1. Global Prevalence in Children:** Approximately 8% of children and adolescents worldwide, which means over 129 million, are affected by ADHD.
- 2. Continued Impact into Adulthood:** Research shows that 60–70% of children with ADHD continue to experience symptoms as adults.
- 3. Global Adult Impact:** An estimated 3.1% of adults globally have ADHD.

PROBLEM STATEMENT AND OUR MISSION

PROBLEM STATEMENT

Millions of people with ADHD struggle every day to stay focused, keep track of time, and resist impulsive urges. While meds and therapy can help a bit, they often bring unwanted side effects and CANNOT teach lasting skills. Having a personal coach—someone to shadow you and keep you on track—works, but it's expensive and just isn't practical for most. There is a critical need for an accessible, scalable, real-time, AI-driven solution that provides continuous focus support and fosters long-term habit development.

OUR MISSION: EMPOWER THROUGH INNOVATION

- Transform challenges into strengths
- Leverage technology to help millions
- Create lasting, positive change

FOCUSGENIE

DESIGNING A NEW SOLUTION

THE BIRTH OF FOCUSGENIE

- Inspired by personal and observed challenges
- Developed through deep research and empathy
- Built using insights from the SCAMPER method

OUR DESIGN JOURNEY

- Deep research and empathy
- Interviews

USER FLOW CHART

BUSINESS OPPORTUNITIES & MARKET POTENTIAL

TARGET MARKET (DEVELOPED REGIONS)

- Approximately 20% of the global ADHD population = 16 million individuals

ADOPTION RATE ESTIMATE

- Capturing 10–20% of this target market = 1.6 to 3.2 million paying users

REVENUE POTENTIAL

- With an average subscription fee of ~\$8/month, annual revenue potential ranges from ~\$153 million to ~\$307 million

MARKET SHARE

- In a digital ADHD solutions market estimated at ~\$1.5 billion annually, FocusGenie could capture 10–20%

BUSINESS MODEL CANVAS OVERVIEW

Microsoft

Seneca
POLYTECHNIC

KEY PARTENERS

Microsoft, educational institutions, healthcare providers, ADHD support groups.

KEY ACTIVITIES

App development, continuous improvement, data analytics.

VALUE PROPOSITION

Real-time, personalized focus management that transforms ADHD challenges into strengths

CUSTOMER RELATIONSHIPS

Personalized onboarding, community support, data-driven insights

CUSTOMER SEGMENTS

Children, adults, families, educators, and professionals

CHANNELS

Microsoft platforms, app stores, online marketing

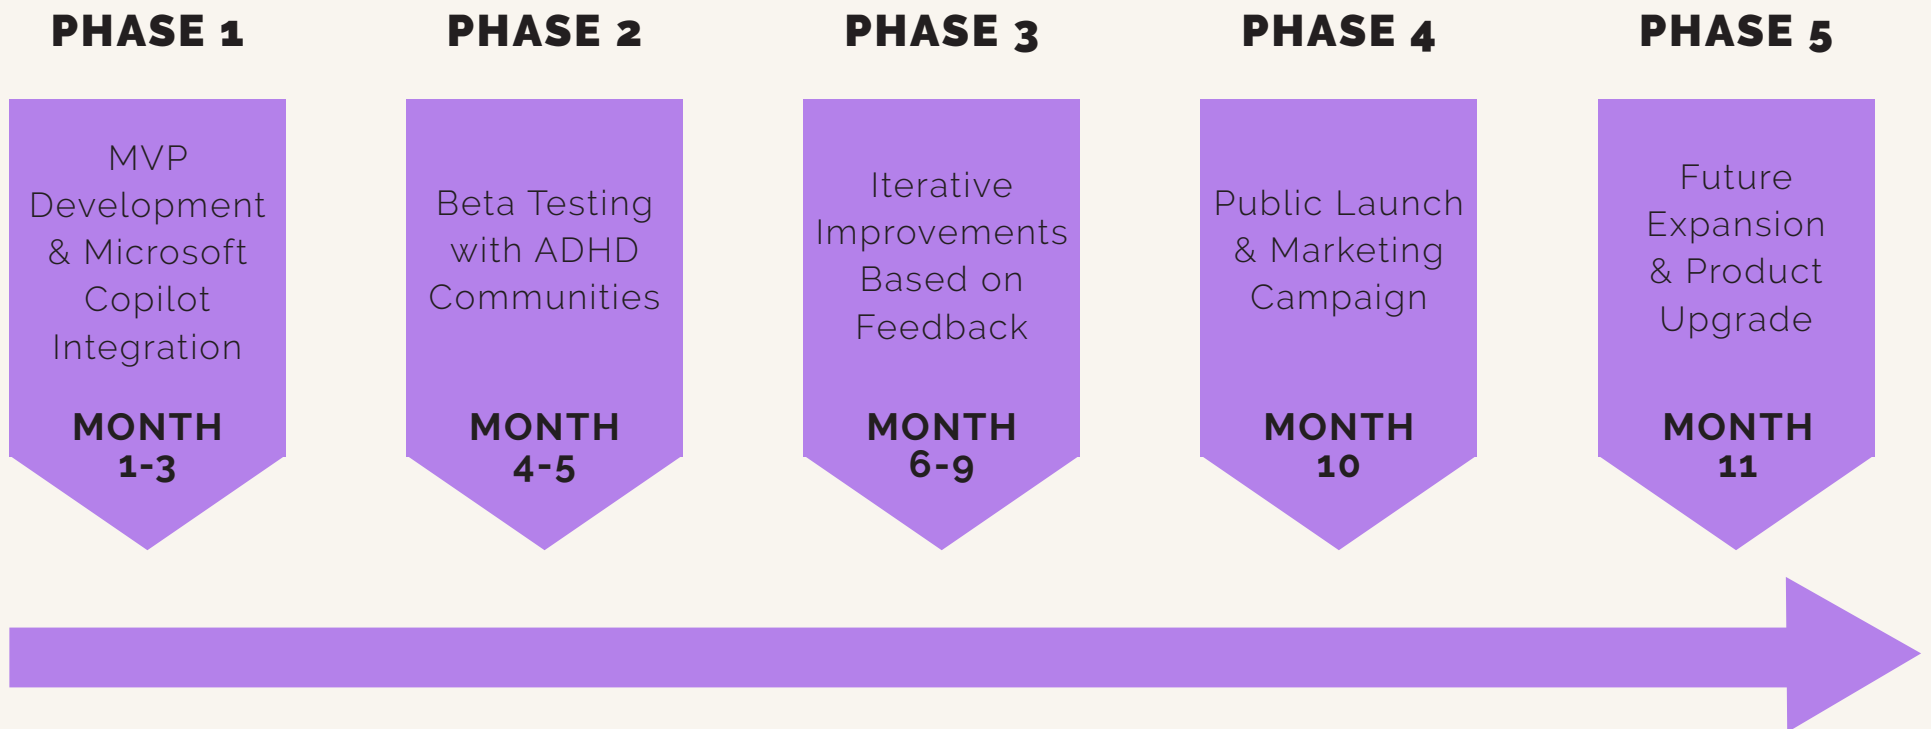

COST STRUCTURE

R&D, marketing, platform integration, customer support

REVENUE STREAMS

Subscriptions, licensing, enterprise partnerships
